AustriaTech

Federal Agency for Technological Measures Ltd.

Vienna | Austria © AustriaTech 2013

About us

- We are a **federal agency** owned by the Austrian Ministry of Transport, Innovation and Technology (bmvit)
- We are a think-tank with **40 employees**
- We are a **neutral partner**, coordinating between infrastructure operators, industry and governmental institutions

Focus

- We support the **deployment of new mobility technologies**, like ITS and electromobility, and their integration into the transportation system.
- We are a catalyst in **technological and organisational development and deployment processes** and carry out quality assurance for mobility services.
- We advise on the content of governance decisions, due to the **comprehensive technological knowledge** and **specialised process expertise**.

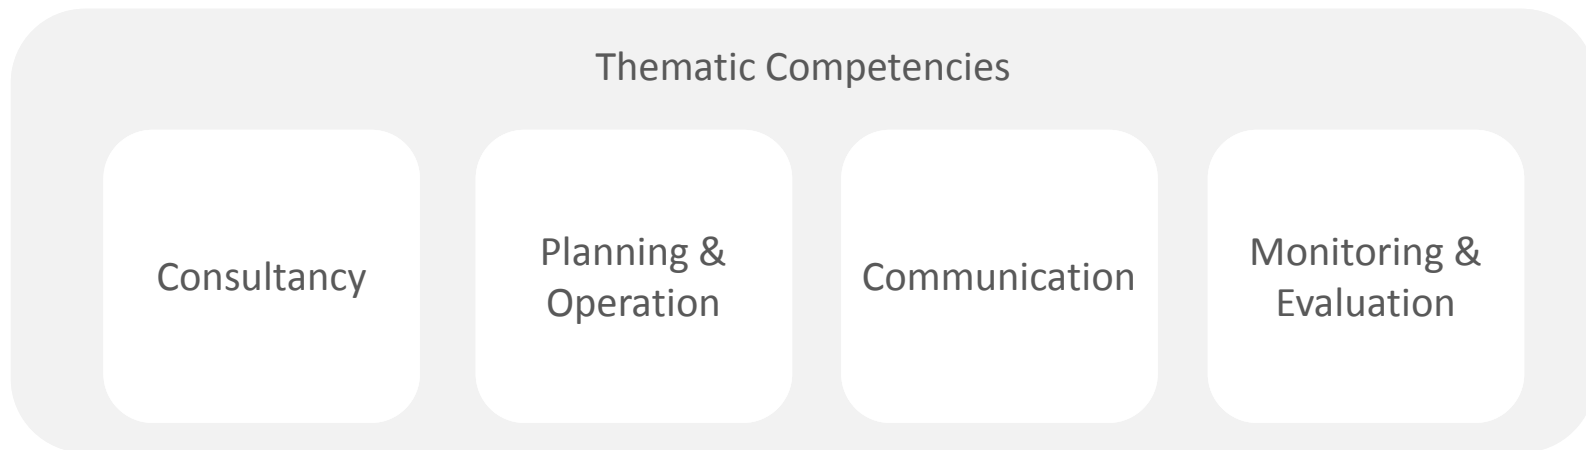

Vision and Mission

„We envisage a **modern, efficient and affordable mobility system.**

As such, it must substantially contribute to the improvement of individuals' quality of life and of the economic competitiveness of Austria.“

Capabilities

As a **coordinator, initiator** and **neutral point of contact**, we ensure that all players in the mobility system are included in processes of **setting-up ITS**.

Thematic Competencies

- Multimodal Traveller Information
- Cooperative Services
- Urban Mobility
- Traffic Management & Public Transport
- Electromobility

Electromobility

- We support the Austrian Ministry of Transport, Innovation and Technology to put the federal implementation plan *Electromobility in and from Austria* into action.
